

BC PharmaCare to Cover Contraceptives

BC PharmaCare has announced, **effective April 1, 2023**, that it will cover eligible contraceptive options for BC residents. Prescription contraceptive options such as oral birth control pills, injections, certain intrauterine devices (Copper/Hormonal IUDs), and contraceptive implants will be covered. The morning-after pill, which does not require a prescription, will also be covered.

In support of this new program, we will no longer provide coverage for BC residents for any prescription contraceptives covered by BC PharmaCare.

Please refer to the BC PharmaCare website [here](#) for more information about the program.
