## **Whole-Person Care**

Integrated supports for your mind & body

If medical care is required, or a disability changes your life, Chambers Plan and our partners work together to help you understand and manage your treatment plan.

If you receive a serious health diagnosis you need more than financial support, all Plans include Teladoc Medical Experts™ (TME), to help you and your treating physician make the best possible decision for your health.

Strong mental health is crucial for well-being. From feeling out of touch, to facing a cancer diagnosis, we help you deal with mental health challenges and adapt your strategy using the many tools we provide.

An employee benefits plan helps members cover the costs of maintaining good health and dealing with illness. This is an important piece in whole-person care.

Your child wakes up with a slight fever, but instead of going to a clinic, you call the Teladoc telemedicine service. You need your prescription filled and your drug benefit pays directly to the pharmacy. You need an expert second opinion on a cancer diagnosis, so you call Teladoc Medical Experts. Then, to help work through the emotions you're experiencing, you connect with the Arete Employee Assistance Program.

Keeping your mind and body healthy is an evolving process. That's why we go one step further with your Plan by offering a comprehensive approach and a continuum of care to help you be your best self.

Easily accessible, confidential services and highly robust mental health programs – our partners are linked with one purpose – to support your well-being, so that, whatever life throws at you, you never have to face it alone.
